

**InstaWeather** is the weather station that brings together all the essential agroclimatic parameters to monitor the temperatures of your field.

### WHAT DOES IT MEASURE?

Parameters / Format	Standard (*)	Plus
Ambient temperature	X	X
Relative humidity (RH)	X	X
Barometric pressure	X	X
VPD (vapor pressure deficit)	X	X
Dew point	X	X
Chill hours	X	X
Chill units	X	X
Degree Days	X	X
Solar radiation		X
Pluviometry		X
Wind speed and direction		X
Evapotranspiration		X

(\*) Pluviometer, pyranometer and anemometer not included.

### BENEFITS

- Real time weather alerts.
- Weather forecast reports are sent periodically via email or SMS.
- Development of predictive temperature models.
